

EVO500H Outdoor

Bradwell Centre for Outdoor Learning

Essex

Case Study

Client

The Bradwell Centre for Outdoor Learning offers an unrivalled outdoor experience for individuals or groups, ranging from children to corporate clients who can choose either a day trip or residential stay. Haynes & Smith Ltd, a leading local construction company, managed the development of their residential centre to ensure it was compliant with the Disability Discrimination Act (DDA).

Problem

The centres residential facilities were all situated on the first floor so, to ensure the building was DDA compliant, a lift was required to give access to everyone. To meet building planning regulations the lift also required some additional modifications.

Solution

An [EVO500H Outdoor Platform Lift](#) was installed to provide disabled access from ground floor to first floor. To meet planning regulations it was enclosed within a structural steel frame overlaid with cladding to match the building's exterior. Robust and reliable, the lift is fitted with reassuring safety features as standard. Simple to use, the lift has low maintenance and running costs.

Testimonial

Trevor Perry, Director at Haynes & Smith Ltd states: "Since working with Evo Lifts on the project, we've put them forward for other developments. We were impressed with their whole customer service experience so would not hesitate to recommend them."

Centre Manager, Jim Ormerod commented: "The lift looks smart, works well and has ensured that we are fully compliant with the DDA."
